

To: The Editor-in-Chief *Knowledge-Based Systems* (Elsevier)

6pt]Dear Editor, 4pt]We are pleased to submit our manuscript, **FreqLite: A Lightweight Frequency-Decompos**

$p \approx 10^{-6}$). (2) **A-RevIN**, a regime-adaptive normalization that strictly generalizes RevIN, engaging under non-stationarity (validated on ILI and a controlled synthetic drift study) and reducing to RevIN without harm otherwise. (3) A **fully reproducible accuracy–efficiency study** on commodity hardware, with all baselines re-implemented and re-run under identical conditions.

4pt]We report results honestly, including settings where *FreqLite* does not lead, and are explicit that the headline stren
